About Us

- John Marshall School of Engineering is an innovative school that promotes engineering practices in the everyday lives of students.
- Students design and build robots, construct energy efficient cars and explore green technology through hands-on experiences.
- Our students have access to an early college curriculum with AP Courses and College Credit Plus.
- Students have access to Engineering Pathways which offer experiences in Aerospace Engineering, Civil Engineering and Architecture Design and Manufacturing.

Student Opportunities

- MAGNET Early College Early Career Manufacturing Internship
- Environmental Sustainability Club
- ACE Mentoring Program
- NASA Club
 - Videogame Studio (publishing video games and creating a portfolio of work with NASA volunteers)
- FIRST robotics (the “ultimate sport of the Mind” where students work in a team to design, build, and program a 50 lb. robot)
- And many more!
